

Cherilyn Faye Felix

Kuala Lumpur • cherilynfaye08@gmail.com

I am a **Full Stack Developer** with over 5 years of experience working across various tech stacks, including web, mobile, and desktop applications. My proficiency spans both front-end and back-end development, having managed multiple projects from planning through to production. My involvement in a wide range of ad-hoc tasks has honed my ability to adapt and excel in diverse environments.

Experience

AUGUST 2025 – Current

Senior Full Stack Developer | Jom Einvoice Sdn Bhd | Kuala Lumpur

Developed and maintained scalable full stack applications using Laravel and VueJS ensuring high performance and security across all platforms. Managed and queried relational databases including MySQL and PostgreSQL to support data-intensive features and improve application responsiveness. Collaborated in an Agile environment, partnering with Product Managers, Designers and Quality Assurance to deliver features through sprint-based delivery.

SEPTEMBER 2024 – SEPTEMBER 2025

Full Stack Developer | Farmbyte Sdn Bhd | Kuala Lumpur

Played a key role in developing core modules for an Order Management System (OMS), achieving a successful product launch within a challenging 5-month timeline. Developed clean, reusable components, optimizing the development workflow and accelerating feature implementation. Worked closely with the QA team to identify and resolve 90% of critical post-production issues, significantly improving system performance and reliability. Assisted junior developers by offering mentorship and support.

JUNE 2024 – AUGUST 2024

Software Engineer | Credentials Daxonet Solutions | Kuala Lumpur

Developed screens and modules based on requirement, specification and coding practices. Enhanced existing programs by analyzing and identifying areas for modification. Performed unit testing to ensure the quality of the code develop. Worked with the team in preparation for go live. Deployed and configured different environments as and when required. Supported, troubleshooted and investigated application issues post go live. Collaborated with project manager, business analysts and team members to deliver project on-time.

SEPTEMBER 2022 – MAY 2024

Full Stack Web Developer | Ocunapse Sdn Bhd | Kuala Lumpur

Utilized the MERN stack for developing robust and scalable web applications. Managed both SQL and NoSQL databases effectively to accommodate various project needs. Developed web applications using React and Next.js to meet internal and client requirements. Developed iOS and Android mobile applications using React Native for various internal and external projects. Troubleshoot and resolve production bugs to ensure seamless application performance. Constructed pivotal systems like Business Intelligence and Customer Relationship Management tools. Collaborated with fellow developers to maintain high-quality, consistent code standards. Partnered closely with UI/UX Designers to translate designs into user-friendly interfaces. Administered and optimized web

applications within AWS for stability and security in the cloud environment.

APRIL 2021 – SEPTEMBER 2022

Application Development Executive | Modularsoft Sdn Bhd | Kuala Lumpur

Contributed to developing personalized card software for prestigious universities, meeting their specific requirements. Designed, developed, and deployed multiple software solutions using OpenCV, C#, and Windows Presentation Foundation (WPF). Developed reliable and tested code for web-based applications using React, Python, and Django. Enhanced an existing internal system by improving processing efficiency and resolving bugs. Engaged actively with clients to enhance software based on their valuable feedback. Created user-friendly documentation for easy reference and guidance.

JULY 2020 – APRIL 2021

Associate Software Engineer | Software International Corporation (M) | Kuala Lumpur

Contributed to developing web-based systems using React, JavaScript, and ASP.NET. Implemented and managed databases using Microsoft SQL Server 2019 Express. Played a key role in resolving and addressing system bugs, aiding in maintaining system reliability. Provided support in managing and organizing documents during resource shortages in other departments.
